In 2002, Robert Kiyosaki and Sharon Lechter published the best-seller ***Prophecy: Why the Biggest Stock Market Crash in History is Still Coming... and How You Can Prepare Yourself and Profit from It!***

Since then Robert has accurately predicted the Lehman Brother collapse, mortgage market collapse, and 401(k) account wipe outs. He also suggested people start investing in hard assets like gold and silver and, over the past few months, we've witnessed a huge run up in both markets.

Looking for [Magnetic Sponsoring](#) or [Auto Lead Generation](#)?

So while many tens of thousands of people have literally lost their homes, retirement savings, jobs and businesses - if you've been following Robert's advice over the past few years you might even be doing BETTER than you were before the latest financial crisis.

The Elevation Group by Mike Dillard

Mike Dillard, the creator of the now famous "Magnetic Sponsoring" system, has earned tens of millions of dollars over the years in the network marketing industry. Recently he stepped down from the helm of this mammoth empire to focus 100% of his time and attention to his new ["The Elevation Group"](#) membership program.

So what is the Elevation Group exactly?

Mike Klingler, another leader in the mlm industry, recently interviewed Mike for over an hour about the elevation group and his intentions behind launching the new program. You can listen to the complete interview down below or even download it and listen it on your ipod or smart phone.

The Elevation Group

Mike Dillard started really taking a look at the state of economic affairs back in 2002 under the mentorship of Robert Kiyosaki. Turns out, I started taking a hard look at the idea of "How to Protect My Money" and "How to Protect Yourself from Economic Disaster" around the same time. Now, of course, Mike was making a whole LOT more money than I was (and still does) but, still, it doesn't take a rocket scientist to see the hand writing on the wall. Not only have we been suffering through the worst economic time in recent history (since the Great Depression) but look forward a few years and the general expert consensus is we haven't really seen anything yet. The worst, unfortunately, is probably still ahead of us.

Personally, I have been focused on three primary things to "prepare for the worst" just in case:

1. Get 100% out of debt including the mortgage
2. Create multiple streams of diversified income
3. Invest in hard assets like gold and silver

The Elevation Group takes the idea of preparing for the worst of times so you can enjoy the best of times to an entirely new level.

So are we talking about DOOM and GLOOM here?

You could look at it that way. But I like to really look at it as just being real, honest and prudent. Let's just face the FACTS of the current economy and learn how to deal with them.

Or even narrow things down to your own personal economic reality...

- Are you making enough money to pay the bills and feed the dog right now without undo pressure?
- What if you lost your job? How long would it be before you lost your home, your cars and your savings?
- Do you have at least 12 months of living expenses put away "just in case"?
- If our currency does lose massive value due to hyperinflation or even deflation... do you have plan for that?

Here's my thought. Mike Dillard's new [Elevation Group](#) is at least worth a look because, from where I'm standing, it is much... much wiser to be prepared for the worst because even if we never do suffer another major financial collapse - life has a way of throwing each and every one of us a curve ball out of left field every now and then. Life happens. We lose jobs, lose businesses, suffer ill health. All kinds of stuff. it's just the way it is.

So at least for me and my family, learning how to not only survive - but thrive - is pretty important.
