Need more backlinks to help your site rank... today?

Need more traffic to your web site... today?

Need more leads and sales... today?

Then welcome to the wonderful world of "**tribe marketing**" by [tribepro](#)!

Tribe Marketing by TribePro

//

Here's the deal...

If you are serious about using the internet to take your business to the next level then you know the secret is to get more highly targeted traffic to your web site, blog, social media accounts and videos.

Because EXPOSURE is the name of the game.

He who tells the most, sells the most.

The challenge is there are basically only three ways of making this happen:

- **Organic Search SEO** - Get your content to rank high on the front page of the search engines for the keywords and phrase people are actively searching for when in the market for your products, services or business opportunity.
- **Paid Search** - Pay to get your content to rank on the search engine and other highly visited web sites on a per-click or per-viewed basis.
- **Direct Traffic** - Participate in forums and other high traffic sites and encourage people to visit your web sites by adding links in your signature area.

The most powerful of the three, long-term, is to get your content to rank organically. Which means actively and aggressively promoting your content to get backlinks. Lots and lots of backlinks. Because backlinks are what cause a page to rank higher in the search engines.

But what if you could find a way to get hundreds, even thousands of backlinks from a variety of social media sites like Facebook, Twitter, blogs and other sites with both traffic and authority?

Drum roll, please...

Tribe Marketing by TribePro

Originally the concept of tribe marketing meant creating a social group or community that was centered around a particular product or service and let the tribe help endorse and promote your products or services by simply participating.

Think WebMD or any active after-sale forum online.

But today, thanks to automated services like Tribepro, tribe marketing can mean much, much more than that. Here is a short list of incredible powerful tribe marketing benefits:

- You get instant authority site backlinks
- You get instant Facebook likes and shares
- You get instant Tweets and Retweets
- You get dozens of non-spam blog comments
- Your content ranks higher on the search engines
- You get more traffic, leads and sales
- You get INSTANT targeted traffic

Oh, and did I mention you get INSTANT targeted traffic, leads and sales? I'm serious, and we'll talk more about that in a second. But first...

Tribepro Tribe Marketing Basics

Tribepro tribe marketing works like this.

You have content you want to promote. I have content I want to promote. We both may or may not be going after the same target market in the same niche. It doesn't matter. Because our goal within the tribe marketing concept is to now WORK TOGETHER to help promote each others content.

So we either create a new tribe or we join an existing tribe within tribepro and we begin "sharing" other others content. Each time we share content by tweeting or liking or posting a bookmark on Reddit, Digg, Google Bookmarks or on any of the other dozens of social bookmarking sites we earn share points. Accumulate 10 share points and now we can post content to be shared.

Tribepro Tribe Marketing Can Be Automated

To take full advantage of the tribe marketing concept you must be willing and able to automatically share other member's content through a variety of social media networks. The idea is the more content you share, the more content your tribe marketing team members will share of yours.

The easiest, fastest way to get both share and get your content shared is through auto-syndication which is very easy to set up.

First, you need to join and set up a free Onlywire.com account and sign up for all the social media sites. Take your time, add a profile picture and a short bio for each service. You will be using this new account for many, many years so spend the time necessary in the beginning to get it set up properly.

Next, consider upgrading to the \$10 or more per month account so you can share at least 1,000 times per month. Personally, I have upgraded to be able to share at least 5,000 times per month because the more YOU SHARE the more your content will be shared. Later, if necessary, I'll upgrade to be able to share even more.

Finally, once you have your onlywire account established, simply upgrade to Tribepro PLUS or Tribepro PRO and follow the instructions to auto-syndicate other tribe marketing member's content and, if you want, have your

content auto submitted and auto-syndicated as well.

Tribepro Tribe Marketing Results

After using the tribepro *tribe marketing* system for less than 60 days and spending less than a hour a week making new auto-syndication connections, I currently enjoy the benefits of having more than 30 people sharing my content.

It works like this...

I post content. WITHIN SECONDS over 30 people auto-syndicate the content and over 600+ new mentions have been placed on twitter, facebook, blogs and various social bookmarking sites worldwide.

Imagine the power of this later when you have 100, even 200 or more people auto-syndicating your content.

Can you say, SEARCH ENGINE DOMINATION!
