[/caption]

A lot of people nowadays are looking for means to gain wealth and prosperity, and to be able to lead a meaningful life.

However, can a series of 10 audio CDs really change your life and give you the untold secret to earning \$10,000 in 24 hours or \$100,000 in 90 days?

Is Kevin Trudeau's *Your Wish is Your Command* a scam or can it really be the key to gaining limitless wealth that anyone would die to have?

Here are some of the pros and cons of the said program. This will help you decide later on whether buying the product is a sound investment or not.

Your Wish is Your Command Scam - The Benefits

Some people believe in the power of the law of attraction, which merely states that a person has the power to attract what is going to happen to him. Good things, bad things, success, failure, love, health, and wealth, all of these things can be attracted and manifested according to some teachings. According to Kevin Trudeau, most of the books and teachings that are already published is just showing the tip of the iceberg when it comes to mastering the law of attraction.

Your Wish is Your Command scam or not, will give new insights on how to maximize the powers of the law of attraction. The set features a recording of lectures given by Kevin Trudeau for the price of \$10,000 per attendee. So, it is quite a steal to grab a copy of a \$10,000-worth lecture for [less than \\$75 on Amazon](#). In addition, the author claims that the ideas presented in the audio books are secrets obtained because of the fact that he is a member of some secret societies that are involved with using the law of attraction to gain massive wealth. The main benefit of buying this program is being able to access powerful secrets in achieving wealth. Which just sounds a little off-base, if you ask me!

Your Wish is Your Command Scam - The Setbacks

For several years, the program has been available but there is no definite proof as to whether the program works or not. There are no material manifestations or tangible tools presented in order to prove that earning \$10,000 in 24 hours is feasible. When buying this type of instructional audio books, one should be aware of the fact that they are mere tools to help one in achieving his dreams or desires. It is not like buying a magical item, such as a ring or a lamp with a genie that will be able to grant all your wishes in an instant. While the law of attraction can hasten the process of achieving wealth, this will be an impossible task if one will not take action and work hard to meet and exceed goals.

It is difficult to include that *Your Wish is Your Command* is a scam. One may need to buy the product in order to find out what the secrets are. These secrets may be the key to tap one's potential in achieving wealth and success. However, these secrets will only work on a case-to-case basis. Gaining access to an idea is not enough, taking action and making that idea work by taking action and working hard is still the ultimate key to being wealthy

and successful.

Now, in all fairness, let me say that I did attempt to purchase this program direct from their web site when it first launched on TV because I do believe we can manifest our own destiny. Not in the sense you can "wish" something into being but, rather, if you take the time to truly determine what it is you want and take actions towards making it happen... AND work past all the hurts, habits and hang ups that have been holding you back... AND pick [the right vehicle](#) for getting the job done - you CAN make incredible things happen

I never did receive the product I ordered even though I called numerous times. Later I had to reverse the charges on my credit card.

What I did receive, however, was a bazillion attempts to upsell me into a \$3,000 private prosperity program. Relentless phone calls from two independent reps that must have both received my name as a hot lead. So if you are curious, pick up a copy from Amazon for [less than \\$75 on Amazon](#), new or used, and save a few dollars and a lot of headaches. Kevin is brilliant marketer, but too far removed from the business to run a fair and ethical business (in my opinion).
